ACCESS CABLE MODEM
TC4400
Ultra-Broadband Cable Modem
for above Gigabit speeds

The TC4400 is the first DOCSIS® 3.1 cable modem introduced by Technicolor offering data services beyond Gigabit speeds.

Highest Performance with DOCSIS 3.1
The TC4400 matches perfectly with the requirements of cable operators willing to propose ultimate Broadband access to their customers.

The TC4400 cable modem is fully compliant with the latest DOCSIS 3.1 specification as published by CableLabs® and is capable of delivering downstream cable speeds of up to 3.6 Gbps by using 2 Orthogonal Frequency-Division Multiplexing (OFDM) downstream channels (and up to 5 Gbps in case of 2 OFDM plus 32 Single Carrier QAM) and up to 1.5 Gbps upstream by using 2 Orthogonal Frequency-Division Multiple Access (OFDMA) upstream channels.

This enhanced and superior performance allows cable operators to propose multi-Gigabit data services to their customers through various applications, from IP connectivity to ultra-high speed internet access and gaming.

Future Proof High-Bandwidth Technology
The TC4400 can be deployed by cable operators on their current network, seamlessly integrating as a DOCSIS 3.0 cable modem offering 32 bonded downstream and 8 bonded upstream channels.

Once cable operators upgrade their network to the new DOCSIS 3.1 standard, the TC4400 supports this migration without any need of intervention at the customer premises due to some of its unique features such as:

- DOCSIS/EuroDOCSIS 3.0 backwards compatibility
- A fully integrated up to 1.2 GHz full band capture wideband tuner
- A switchable diplexer that allows to support existing band split as well as future DOCSIS 3.1 band split on the same hardware.

Advanced Security
To secure data exchange between the cable modem and the cable operators’ servers, BPI+ communications privacy is used.

Easy to Use
Like all Technicolor modems and gateways, the TC4400 is an easy to use, easy to install device.

For convenience of the end user, the easy-to-access LEDs provide a clear indication of start-up sequence, operational status, and connectivity status.

Multiple integrated web pages also allow direct access to the status and settings, including privacy and security information.
